

Tempest Reader

The Industry's First Touch Screen Card Reader

NuVision Networks introduces the first and only touch screen card reader in the industry, the Tempest Reader. Far more than just an activity reader, the multi-functional Tempest reader is capable of a wide variety of applications including: attendance, event access privileges, equipment check out, status verification, cash transactions, product movement and more. In addition, the Tempest is fully encrypted with NVN's unparalleled AES 256-bit encryption with Packet-Lok™. Making it even more secure, the Tempest is also the first of its kind to display the cardholder's picture on every check out screen.

FEATURE HIGHLIGHTS:

- Interactive touch screen menus
- Displays cardholder's picture
- Accepts cardholder signature
- Built-in AES 256-bit encryption, with Packet-Lok™
